

# HART of Folsom

Assisting those experiencing homelessness in Folsom toward self-sufficiency and greater independence

## Who we are...

We are volunteer members of various churches that have come together to take proactive steps to address the issue of homelessness on Folsom.

## What we do:

### We work with individuals –

Our main component of our program is to establish a mentoring relationship with the individuals (clients) that is built on respect and trust. We create a comfortable and loving relationship that allows the client to become self-assured and empower them to become independent and self-sustaining. We desire to help our clients to become positive and productive members of our community.

### We work with other organizations –

We are a resource team for the individuals and connect them to services or programs that will assist them on their path to a better life. We believe that each organization we connect with is skilled in their own mission; we will support and encourage the client during these contacts. We are proudly partnered with many organizations, but are always on the outlook for others to join us in our mission.

## Our Goals

- Assist in meeting basic needs
- Encourage movement out of Homelessness
- Connect to Resources
- Mentor individuals
- Teach and assist with budgeting
- Aid in gainful employment
- Assist in locating affordable housing

## What are we doing?

As the cold weather approaches we are working with local churches to create a rotating winter shelter where we can get individuals out of the elements. The nightly shelter will be hosted at local churches for a week at a time to provide a warm meal and safe place to sleep. This will be our first year, but we will operate on the successful plans from our sister organizations.

We are meeting the homeless where they live; getting to know them and identifying those that want to work toward a better life and to resolve issue that brought them into homelessness.

We are working with the City hired navigator and psychiatrist to meet the immediate need and to create a managed plan to assist those in need.

We are the linking arms to locate and connect those in need to State, County and non-governmental resources.

### What we will be doing in the future:

- ❖ Locate and manage a transitional home
- ❖ Develop affordable housing opportunities
- ❖ Cultivate jobs and opportunities for earning money

## What are our immediate needs?

### Funding – Volunteers - Housing

## Sign up to help during our winter shelter

It won't take too much time, but it will give you tremendous fulfillment.

There are so many hands needed, but only in small easily fulfilled sessions. If you could give your time once a week for our twelve-week session we would love to connect with you.
